

The VirtuOx Total Solution

Low cost software + low cost oximeters =

The industry's most cost effective way to qualify oxygen patients!

VirtuTrack

- Track Medical Assets in patients home
- CDMA 3G Module Integrated
- Attaches to any medical equipment
- Verify use / nonuse of equipment

VirtuTrack Product Features:

- Unique Chain of Custody design secures VirtuTrack to any asset
- Tracks medical asset throughout USA, never used like trans filling oxygen systems
- Ability to verify use / nonuse of medical asset thru VirtuOx portal
- Attaches to any medical asset in your fleet
- Ideal for:
 - Non Invasive Ventilators (NIV)
 - Oxygen Trans Filling Equipment
 - Negative Pressure Wound Therapy (NPWT)

VirtuTrack

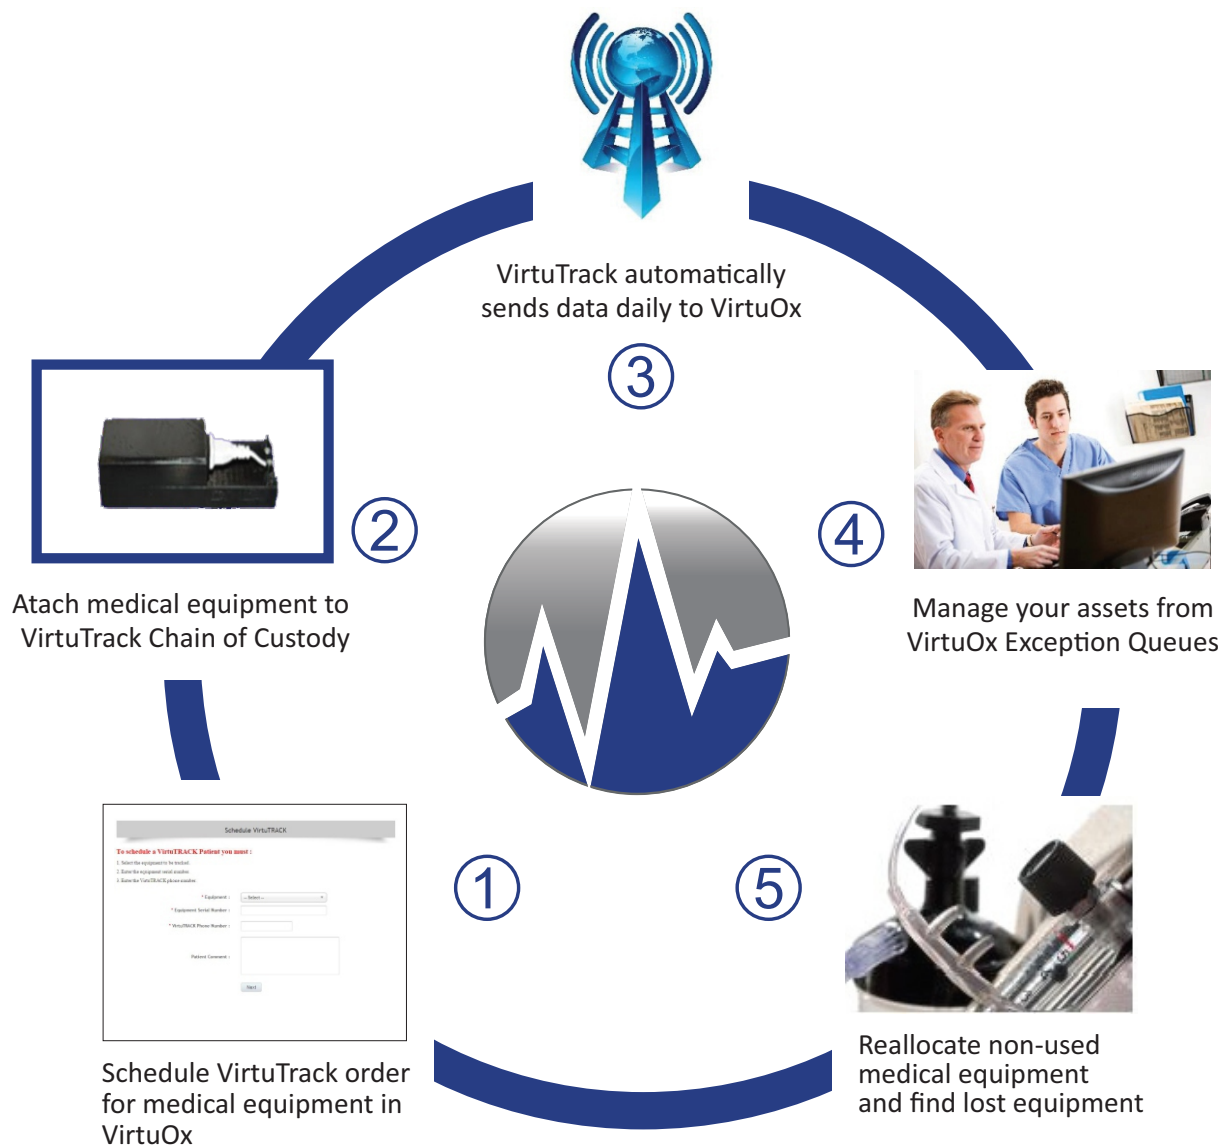

VirtuTrack was designed to help Durable Medical Equipment (DME) providers better manage their capital equipment in remote locations like patient homes.

VirtuTrack integrated a cellular module into a Chain of Custody (CoC) power pack that tracks key metrics such as:

- Medical Equipment Powered On/Off
- VirtuTrack Plugged In/Out from wall

With these real time notifications, VirtuTrack will allow the provider to repurpose unused expensive medical equipment like an Oxygen Transferring Systems and re-deliver a more cost effective gas portability system like E Cylinder/M6 Conserver Systems.

VirtuTrack will also allow the provider to know immediately know when VirtuTrack power pack is unplugged from the wall which could mean the patient has expired and your equipment is needed to be picked up.
